**File IO Assignment**

```
public class main {
   public static void main(String[] args) {

      File file = new File("example.txt");

      try {
         // Create file only once
         if (file.createNewFile()) {

            FileWriter writer = new FileWriter(file);
            writer.write("Sergio\n");
            writer.write("Bruna\n");
            writer.write("Rachel\n");
            writer.write("Isabela\n");
            writer.write("Viviane\n");
            writer.close();

         }
      } catch (IOException e) {
         System.out.println("Error writing the file.");
      }

      // Read and print names
      try {
         Scanner reader = new Scanner(file);
         while (reader.hasNextLine()) {
            System.out.println(reader.nextLine());
         }
         reader.close();
      } catch (IOException e) {
         System.out.println("Error reading the file");
      }
   }
}
```
